

## Aqua Metric Response on Sensus iCON A Electric Meter

**From:** Kenny Wetzel  
**Subject:** RE: Additional meter information needed

In regards to the publics' concern about the meter being able to monitor the use of electrical devices inside the home:

The Sensus iCON A electric meter has the ability to monitor devices within the home **ONLY** if equipped with an add-on feature called a **ZigBee certified with PKI authentication**. Your Sensus iCON A meters were **NOT** ordered with this feature. In addition the electrical device within the home must also have the **ZigBee certified with PKI authentication** this feature would allow the device and the electric meter to communicate with each other.

So the short answer is **THE NEW SENSUS ELECTRIC METERS BEING INSTALLED IN BRADY WILL NOT MONITOR ANY DEVICE WITHIN THE CUSTOMERS HOME.**

I hope this information will help you provide your customers with a clear understanding of our products.

Thanks

Kenny Wetzel
